

The Soil Will Save Us: How Scientists, Farmers, and Ranchers Are Tending the Soil to Reverse Global Warming

Filesize: 1.6 MB

Reviews

*It is an remarkable ebook which i have possibly read. It really is packed with wisdom and knowledge
Its been printed in an extremely easy way which is only after i finished reading through this pdf by
which really altered me, alter the way i believe.*

(Dr. Nikolas Mayer)

THE SOIL WILL SAVE US: HOW SCIENTISTS, FARMERS, AND RANCHERS ARE TENDING THE SOIL TO REVERSE GLOBAL WARMING

Audible Studios on Brilliance, United States, 2016. CD-Audio. Book Condition: New. Unabridged. 171 x 133 mm. Language: English . Brand New. Thousands of years of poor farming and ranching practices and, especially, modern industrial agriculture have led to the loss of up to 80 percent of carbon from the world's soils. That carbon is now floating in the atmosphere, and even if we stopped using fossil fuels today, it would continue warming the planet. In *The Soil Will Save Us*, journalist and bestselling author Kristin Ohlson makes an elegantly argued, passionate case for our great green hope—a way in which we can not only heal the land but also turn atmospheric carbon into beneficial soil carbon and potentially reverse global warming. As the granddaughter of farmers and the daughter of avid gardeners, Ohlson has long had an appreciation for the soil. A chance conversation with a local chef led her to the crossroads of science, farming, food, and environmentalism and the discovery of the only significant way to remove carbon dioxide from the air—an ecological approach that tends not only to plants and animals but also to the vast population of underground microorganisms that fix carbon in the soil. Ohlson introduces the visionaries—scientists, farmers, ranchers, and landscapers—who are figuring out in the lab and on the ground how to build healthy soil, which solves myriad problems: drought, erosion, air and water pollution, and food quality, as well as climate change. Her discoveries and vivid storytelling will revolutionize the way we think about our food, our landscapes, our plants, and our relationship to Earth.
