LABORATORY PRACTICE FOR BEGINNERS IN BOTANY (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Laboratory Practice for Beginners in Botany The writer has been frequently asked to express to others his ideas on the subject of the teaching of botany in the schools. He has been led to consider the problem from a number of different points of view and to try a number of different methods in attempting a satisfactory solution. After experimenting with a number of classes of beginners both in the preparatory schools and in the university, he has arrived at the following conclusions: - Botany in the preparatory schools should be taught - 1. As a science, to cultivate careful and accurate observation, together with the faculty of making from observations the proper inferences; and 2. As a means of leading the mind of the student to interest itself in the phenomena of nature for its own further development and profit. In order to make the study of botany more effective under the first head, it seems best to bring the student into immediate contact with the object itself, in the laboratory; and not only that, but to avoid interposing apparatus, as far as possible, between the student and the object to be studied.
